Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claims 1-18 are allowable because in a method of manufacturing an organic electroluminescent display as set forth in claim 1, the prior art does not teach or suggest the step of applying a cross-linking process to the non-photosensitive insulating layer.

Claims 19-27 are allowable because in a method of manufacturing an organic electroluminescent display as set forth in claim 19, the prior art does not teach or suggest the steps of applying a baking process to the non-photosensitive insulating layer; dipping an aggregate composed of the substrate with the first display electrodes, the non-photosensitive insulating layer and the photosensitive insulating layer disposed thereon into a developer solution, whereby the photosensitive insulating layer is partially removed through development and the non-photosensitive insulating layer is partially removed by etching, thereby partially exposing the first display electrodes; and curing the aggregate.

Claims 28-30 are allowable because in a method of manufacturing an organic electroluminescent display as set forth in claim 28, the prior art does not teach or suggest forming a first photosensitive insulating layer over the substrate; forming a second photosensitive insulating layer on the first photosensitive insulating layer; performing a photolithography process on the first and second photosensitive insulating layers; developing the first and second photosensitive insulating layers simultaneously so as to form a pattern of fist and second photosensitive insulating layers having a shape with a longitudinal axis substantially perpendicular to a longitudinal axis of the

Art Unit: 1756

first display electrodes, and the first display electrodes being exposed partly; wherein the photosensitivity of the first photosensitive insulating layer is different from that of the second photosensitive insulating layer.

Claims 31 and 32 are allowable because in a method of manufacturing an organic electroluminescent display as set forth in claim 31, the prior art does not teach or suggest forming a first photosensitive insulating layer over the substrate; forming a second photosensitive insulating layer on the first photosensitive insulating layer; performing a photolithography process on the first and second photosensitive insulating layers so as to define a shape with a longitudinal axis substantially perpendicular to a longitudinal axis of the first display electrodes; dipping an aggregate composed of the substrate with the first display electrodes, the first photosensitive insulating layer and the second photosensitive insulating layer disposed thereon into a developer solution, whereby the first and second photosensitive insulating layers are partially removed through development, thereby partially exposing the first display electrodes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John A. McPherson whose telephone number is (571)

272-1386. The examiner can normally be reached on Monday through Friday, 8:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Huff can be reached on (571) 272-1385. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
